Vertical IEC PDU

Picture shows   IEC/16

- 10A IEC C13 60320(320) sockets
- Tough aluminium extrusion
- Shrouded switch and switch cover
- C14, C20, or 16A commando options
- 3m 1.5mm cable

Vertical IEC PDUs are widely used to accommodate cabinets where a higher number of IEC sockets are needed, but rack space is also at a premium. Being mounted at the back of the cabinet means that the PDU maintains a '0U' profile, allowing the rest of the cabinet to be populated with critical hardware.
